Ingredient statement:	
Composition:	Saccharose, algae meal, glucose syrup
Additives:	Natural identical flavour

1,5 kg

EQUITOP MYOPLAST[®] is a high quality feed supplement designed to support the muscle structure of your horse. The mixture contains algae powder and provides the muscles of your horse with 18 amino acids in a unique composition. Thus, EQUITOP MYOPLAST[®] supports the physiological formation and functioning of the muscles during intensive training periods.

EQUITOP MYOPLAST[®] is available as tasty pearl granules to ensure that your horse willingly eats the product and thereby gets the maximum benefit from its components. The specified processing of the granules ensures a consistent quality of the delicate ingredients.

FOR ANIMAL USE ONLY. Not for human consumption.

Feeding recommendation:

Big horses: 50 g (2 level spoonfuls using the enclosed measuring spoon) once daily.

Small horses and ponies: 25 g (1 level spoonful using the enclosed measuring spoon) mixed with the normal feed.

During intensive performance periods the daily ration may be doubled.

Feeding period: At least 4 weeks. When needed, the granules can be administered constantly or at regular intervals.

Storage instructions: Keep the container tightly closed. Protect from moisture and sunlight. Keep out of reach of children.
